**Child Mortality Rate Drops Worldwide:**

A UNICEF study released in September shows a drop in child mortality worldwide.

Improved antimalaria measures and simple health practices have contributed to the decline of child deaths. The study showed that an estimated 8.8 million children under five died in 2008 compared with 12.5 million in 1990, a drop of 28 percent and the lowest since recordkeeping began in 1960, UNICEF says. "These new figures underscore the importance of the work that Rotary does," says RI President Dong Kurn Lee, who chose to focus on child mortality during his term.
